☺	Current Products
☹	Discontinued products
-	No video output from iPod

1. iPod screen does not support Dension menu of the ice>Link Plus and the Gateway 300v1 / 400. Function of Disc 6 has changed accordingly in new firmware upgrades, which are available now.
2. iPod does not display song information in iPod Gateway Interface mode. Please note, active products don't have this feature.
3. iPod does not charge. Solution is to use a dock cable with blue mini-DIN connector, already available. Active Cradles are compatible with the iPod, replacing them is not necessary.
4. After connecting the iPhone, a warning message will be displayed, please continue with normal operation.
5. New Active Cradle sleeves are required to hold nano 4G, touch 2G and iPhone 3G securely. (Due 1<sup>st</sup> Quarter 2009)
6. This product does not support iPod video output even with 'IVE1000' interfaced
7. Apple has changed the charge specifications (5V only) on newly released iPods. Marked products cannot charge these iPods.

\*GW100v1 is referring to product code GW15\_\_\_ & GW100v2 is referring to product code GW16\_\_\_.

\*\* GW300v1 is referring to product code GW3R\_\_\_ & GW300v2 is referring to product code GW32\_\_\_. (400 is the discontinued product Gateway400, which had a built in CD changer retention)

\*\*\* Dension products 'Lite' and 'ice>Link ONE (FM)' will be replaced shortly to be compatible with the new iPod range. (Due 1<sup>st</sup> Quarter 2009)
