

USER MANUAL

FOR

GATEWAY 500S BT

DENSION
LEADING IN CONNECTED ENTERTAINMENT

1. INTRODUCTION

The Dension Gateway 500S BT lets you connect your USB flash drive, iPod and iPhone to your original car radio, providing music playback and menu based control through your vehicle's entertainment system, using the original controls of the car stereo.

Package contents

- ▶ Gateway 500S BT device
- ▶ Power cable
- ▶ Connector port
- ▶ Optical cable kit (MOST™)
- ▶ Zip ties
- ▶ Microphone

The Gateway 500S BT also offers Bluetooth connectivity for A2DP music streaming and hands free mobile call handling via the original buttons and screens of your vehicle.

2. SUPPORTED AUDIO DEVICES

USB

- ▶ USB stick and external hard drive with one partition
- ▶ **File system:** FAT32
- ▶ **Storage capacity:** up to 320 GB music content
- ▶ **Music format:** MP3 and WAV

iPod and iPhone devices with the 30-pin connector require the optional Dension "30-pin Dock cable" (IPDC1GW)

- ▶ iPod (4th generation)
- ▶ iPod Nano (1st, 2nd, 3rd, 4th, 5th and 6th generations)
- ▶ iPod Mini
- ▶ iPod Photo 4G
- ▶ iPod Video 5G
- ▶ iPod Classic
- ▶ iPod Touch (1st, 2nd, 3rd and 4th generations)
- ▶ iPhone (3G, 4G)

iPod and iPhone devices with Lightning connector can be used through Lightning-USB cable (not included)

3. THE MAIN MENU OF THE GATEWAY

Before you start, please check that your iPod or iPhone is up-to-date. You can get the latest firmware updates via iTunes or the settings menu on your device. If you use a USB device, please check the above mentioned requirements.

Getting started

Switch your head unit (car radio) ON and select CD changer as source. If in doubt consult the audio section of your car's instruction manual! Depending on your head unit, the music menu can be browsed with radio buttons (Next / Back), MMI or iDrive controller (for further details please go to Section 8). Through the CD changer option you should see the menu of the Gateway in CD6 or CD1 (head unit dependent).

About the Main menu

In this menu you can find the following options:

- ▶ **Now playing:** this brings you to the currently played song
- ▶ **Source:** here you can select between sources connected to the Gateway
- ▶ **Music:** you can browse the music content of the selected source (except AUX and Bluetooth)
- ▶ **Settings:** here you can find more information on the Gateway device and change the various options

4. SOURCES

If you connect a source to the Gateway, that source will start playing automatically. In case that source has been in use earlier, the music will continue from the last played position. In the 'Source' menu you can select the source you want your music played from. These can be:

- ▶ **GW AUX:** In AUX mode the radio displays 'AUX GW' on the radio screen and cluster display (car/head unit dependent). No control functions are available.
- ▶ **Bluetooth audio:** Bluetooth music is possible from a paired A2DP streaming capable phone. The playback is controlled from the phone or with the 'Next' and 'Previous track' buttons of your car (phone dependent). In this mode the ID3 tag info can be displayed on the radio screen too (phone dependent).

Please note: Bluetooth audio function may be disabled by default. It can be enabled from the 'Settings' menu.

- ▶ **iPod UI:** The original user interface of the iPod remains active (i.e. the click wheel still works) so you can use it for browsing as normal. In this mode the ID3 tag info will not be displayed, time counter is not synchronized and only 'iPod UI' will appear on the screen.
- ▶ **iPod GW:** The click wheel or the touch screen (iPhone, iPod touch) is disabled, iPod displays the currently played song information, except on touch and iPhone where 'Accessory attached' message is displayed. The iPod playback control is possible from the car stereo (head unit) or the steering wheel only. In this mode the ID3 tag info and the time is displayed on the radio display (radio dependent).
- ▶ **USB:** The playback is controlled from the Gateway device. ID3 tag info will be displayed (if those details are properly filled out).
- ▶ **DAB radio*:** After selecting this source you will be able to listen and manage digital radio through DAB+G.

Please note: Gateway returns to the 'Now playing' menu after you choose a music file.

* DAB+G is required in addition (DBGIGEN)

5. MUSIC MENU

Here you can browse and select the music content of the connected device.

- ▶ **USB:** Files, Artists, Albums, Titles, Bookmarks are available
- ▶ **iPod/iPhone:** Playlists, Artists, Albums, Songs, Genres

Please note: In case the playlist/album contains more than 30 items (songs) the whole list cannot be displayed on the same screen due to the technical limitations of the radio. It will be split into pages (sub lists) containing 30 items.

6. SETTINGS MENU

Volume

The volumes menu allows you to set the outgoing volume level of the Gateway for every source:

- ▶ USB, iPod, AUX, Bluetooth volumes for music playback
- ▶ Phone, microphone volumes for hands free calls

Please note: You can change only the outgoing volume of the Gateway (if it's too low or distorted) through this menu. Changing the final volume (car dependent) is possible only with the volume knob.

Language

This lets you change the language of the Gateway's menu.

Phonebook

In the phonebook menu you can switch off the automatic download (sync) of the phone book, which may be required in the case of certain phone models. If it's disabled, the Gateway won't ask the contacts list from your phone.

Phonebook display order

You can change how your contacts are listed (first name order or family name order).

Bluetooth audio

You can turn the BT audio option ON if you want to play Bluetooth music from mobile phone via A2DP. If you change this function, then you also need to turn the whole car OFF completely till the blue LED goes OFF on the Connector port to finalize the new setting – meanwhile please delete the pairing on your phone as well! After this you can turn the whole car back ON, repair with your phone and select the BT audio option from the Gateway's source menu.

Ringtone

You can choose or disable all ringtones here.

Paired phone

The last 4 paired phone names (ID) are listed here. You can force pairing from this menu too if you select a phone device on the list. It is also possible to delete all the paired phones.

About

Provides information on the Gateway product (e.g. software and firmware version, serial number, etc.).

7. BLUETOOTH AND PHONE FUNCTIONS

The Gateway uses the car's factory phone option. Supporting phonebook, call history while using the same controls and surface as of a factory phone module. However due to different head unit specifications, you may experience some limitations when favourite lists or other head unit specific lists are not available.

How to make Bluetooth connection

First of all you need to pair your phone to the Gateway. Please turn ON the whole car and on your phone switch Bluetooth option ON.

Go into the Bluetooth menu of your phone and search for available Bluetooth devices. On the list 'GW500S' will appear. Select and enter pin code '0000' for pairing, and allow phone book synchronization if it's asked. After the first pairing the Gateway will always look for the paired phones and connect automatically.

Please keep the Bluetooth of the phone ON to let the Gateway communicate with it during the start up. The device supports 1000

phone numbers in the phonebook, however in some cases it could be less because of the limitation of the head unit.

How the phone function works

To enter the phone menu press "PHONE" or "TEL" button or select Communication option with the iDrive controller. In the phone menu you will see your synced contacts and the call history. You can start a phone call if you select one of your contacts here. When you get an incoming call, the car will turn into phone mode, it will also mute the current source temporarily. If one of your contacts is calling, then you will see his/her name, in other cases you will only see the phone number. You can answer or deny the call by the controls of the car. When it's finished, the car will switch back to the previous source and continue.

How the Bluetooth music streaming is possible

The Gateway supports Advanced Audio Distribution Profile (A2DP) and Audio/Video Remote Control Profile (AVRCP 1.3) for audio playback.

In this mode ID3 tag will be displayed on the head unit screen (phone dependent) and Next/Back/Play/Pause functions are available from the head unit or the steering wheel controls (phone and car dependent). You can reach the Bluetooth-streamed music from your (paired and connected) phone if you go into the source menu of the Gateway.

8. OPERATION IN PORSCHE

First steps

Switch on your car radio and go to the menu's media section by pressing the 'Audio' button. To reach the CD changer option, you will need to press the CD button after this.

Connect your iPod or USB storage to the Gateway. It will start playing the first song on the device. In case the Gateway was in use earlier, the music will continue playing from your iPod or USB from where it stopped previously.

When switching off the radio, the playback will stop and the source device will go on standby.

You can pair the Gateway 500S BT with a Bluetooth capable mobile phone for music streaming (requires an A2DP capable phone) or hands free (if that option is active in the Gateway). Pairing is controlled from the mobile phone, the same way as connecting to other Bluetooth accessories.

The pin code to the Gateway 500S BT is 0000.

Accessing the menu

The menu of the Gateway is displayed on the PCM head unit.

Entering the menu

To enter the menu of the Gateway, you need to go into the „CD List” menu on the PCM unit and move the cursor to CD6 (called "Menu") by rotating the right side rotary knob, then select it by pressing the same knob.

To see the information of the currently played song, you need to select the 'Now Playing' menu (CD1). The device jumps to 'Now Playing' mode automatically after a certain time or if a song is selected in the menu.

After the CD6 "Menu" is selected, you can browse the menu with the 'Next'  and 'Previous track'  buttons.

To enter a menu, you need to press and hold the 'Fast forward' button. To go back to the previous menu, you need to press and hold the 'Previous

track' button. In addition you can also browse the menu with the right side rotary knob, but please note that in this mode due to limitations of the head unit's software the last selected menu element cannot be selected (where the menu cursor previously was is not selectable again, only if you select another menu element before that).

Selecting the music source

In the source menu you can select from the available music sources.

Please note: In all cases the Gateway starts playing the last connected music source automatically.

These sources can be:

- ▶ **GW AUX:** The analogue Aux input of the Gateway. No control function is available. AUX can be used if Connector port is connected.
- ▶ **Bluetooth audio:** From a paired A2DP streaming capable phone. The playback is controlled via the phone or with the 'Next' and 'Previous' buttons of your car (phone dependent).
 - ▶ **Please note:** Bluetooth audio may be disabled by default but can be enabled from the 'Settings' menu of the Gateway device.
- ▶ **iPod UI:** The playback is controlled via iPod.
- ▶ **iPod GW:** The playback is controlled from the Gateway device (in this case the iPod controls get disabled).
- ▶ **USB:** The playback is controlled from the Gateway.

- ▶ **DAB radio***: After selecting this source you will be able to listen and manage digital radio through DAB+G.

* DAB+G is required in addition (DBGIGEN)

Browsing and selecting music (iPod or USB)

In the music menu you can use certain menu items to browse the content of the iPod/iPhone or USB device:

- ▶ For USB devices Files, Artists, Albums, Titles, Bookmarks make browsing and selecting music files easier.
- ▶ For iPod/iPhone devices the following submenus will help you with browsing and selection: Playlists, Artists, Albums, Songs, Genres, Composers

Listening and managing DAB (Optional DAB+G accessory is required)

After the DAB radio source is selected, you will see the 'DAB Stations' menu in the main menu of the Gateway. Here you can find the following options:

- ▶ **All stations**: Here you can find all the available stations based on the previous scan.
- ▶ **Favourites**: Your favourite DAB stations. By pressing and holding the fast forward button for 3 seconds while listening to a station, you can add it as a favourite. To remove it from the favourite list, press the previous track button longer. You can also select the 'Delete favourites' option in the 'Favourite stations' menu, with this method you will remove all the stations from the list.
- ▶ **DAB scan**: If you select this option the device will do a full DAB scan and then start playing the first available station (in alphabetical order). **Please note**: When travelling frequently between different locations it is recommended to rescan all the stations since the items in the previously saved list might not be available anymore. After the scanning only the 'All stations' list will be refreshed. The existing favorites list remains unchanged.
- ▶ **Service following**: The device has service following support so the currently played station might be available even after moving from the area where the station was originally broadcasted on a different frequency.

Settings menu

Here you can modify the basic Gateway settings in order to personalize it for your needs and make it work properly with your car.

- ▶ **Volumes:** This menu allows you to set different volumes in the system:
 - ▶ iPod, USB, AUX, Bluetooth volumes for music playback
 - ▶ Phone and microphone volume for hands free calls
- ▶ **Languages:** Here you can select between more than fifteen different languages.

Please note: this setting will modify only the language of the menu which is displayed by the Gateway.
- ▶ **Phonebook:** Here you can switch off the automatic download of the phonebook, which is needed in case of certain phone models.
- ▶ **Phonebook display order:** This menu allows you to modify the order of the displayed names. It could be (First then Last or Last and then First name.)
- ▶ **Bluetooth audio:** In case you want to play music via A2DP from your mobile phone, turn the Bluetooth audio option ON here.
- ▶ **Ringtone:** To hear the ringtone of the Gateway this option needs to be turned ON.
- ▶ **Paired Phones:** Previously paired phone names (ID) will be listed here, but only the last four. You can perform pairing from this menu too by selecting the phone from the list. You can also delete the phones from the pairing list.
- ▶ **About:** In this menu, you can check the current firmware version of the Gateway and the connected accessories.

Please note: After changing settings you need to turn the Gateway off completely in order to load the system with the new settings. For your information: some settings (e. g. volume) don't require restart.

Using the phone menu

You can enter the 'Phone' menu by pressing the TEL button on the PCM head unit. Here you will see the following menu items:

Phonebook: You can select a phone number from your address book to initiate a call. Contacts are shown in alphabetical groups, followed by all contacts in alphabetical order.

Received / Missed / Dialed calls: Provides access to the respective call logs.

Please note: For consistency reasons the Gateway does not store the phone numbers, therefore your phone resynchronizes every time when it connects to the Gateway. Synchronization is possible up to 1000 phone numbers (entries with multiple phone numbers synchronize as multiple entries). The amount of the contacts depends also on the car head unit, so in some cases it might be less than 1000 contacts.

Receiving and making phone calls

When receiving an incoming call, the caller number (if provided) or the corresponding contact name in your phonebook is displayed.

You can answer the call by pressing the phone button on the PCM head unit, or on the steering wheel (if available). In this moment the music or radio gets muted and the audio of the call is directed to the speakers.

Rejecting an incoming call is also possible by the phone buttons.

Please note: ABC search function and call histories are available in the Phone menu.

9. OPERATION IN BMW WITH iDRIVE

First steps

Switch on your car radio and go to the 'Entertainment' section of the menu, pulling the iDrive controller backwards. To reach the CD changer option, you will need to select 'CD' in the upper row of the menu.

Connect your iPod or USB storage to the Gateway. It will start playing the first song on the device. In case the Gateway was in use earlier, the music will continue playing from your iPod or USB from where it stopped previously.

When switching off the radio the playback will stop and the source device will go on standby.

You can pair the Gateway with a Bluetooth capable mobile phone for music streaming (requires an A2DP capable phone) or hands free (if that option is active in the Gateway). Pairing is controlled from the mobile phone, the same way as connecting to other Bluetooth accessories.

The pin code to the Gateway 500S BT is 0000.

Accessing the menu

The menu of the Gateway is displayed on the main display of the BMW iDrive.

Entering the menu

To enter down the Gateway menu list you need to pull the iDrive controller backwards. After you reach the menu, you can navigate between menu

options by rotating the iDrive controller. If you move the cursor to a certain menu, you can select it by pushing the iDrive controller.

To see the information of the currently played song, you need to select the 'Now Playing' menu. The device jumps to the Now Playing mode automatically after a certain time or if a song is selected in the menu.

Selecting the music source

In the 'Source' menu, you can select between the available music sources.

Please note: The Gateway starts playing from the last connected music source automatically.

These sources can be:

- ▶ **GW AUX:** The analogue Aux input of the Gateway. No control function is available. AUX can be used if Connector port is connected.
- ▶ **Bluetooth audio:** From a paired A2DP streaming capable phone. The playback is controlled via the phone or with the 'Next' and 'Previous' buttons of your car (phone dependent).
Please note: This feature may be disabled by default but can be enabled from the 'Settings' menu of the Gateway device.
- ▶ **iPod UI:** The playback is controlled via iPod.
- ▶ **iPod GW:** The playback is controlled from the Gateway device (in this case the iPod controls get disabled).
- ▶ **USB:** The playback is controlled from the Gateway.

- ▶ **DAB radio*:** After selecting this source you will be able to listen and manage digital radio through DAB+G.

* DAB+G is required in addition (DBGIGEN)

Browsing and selecting music (iPod or USB)

In the music menu you can use certain menu items to browse the content of the iPod/iPhone or USB device:

- ▶ For USB devices Files, Artists, Albums, Titles, Bookmarks make browsing and selecting music files easier.
- ▶ For iPod/iPhone devices the following submenus will help you with browsing and selection: Playlists, Artists, Albums, Songs, Genres, Composers

Listening and managing DAB

(Optional DAB+G accessory is required)

After the DAB radio source is selected, you will see the 'DAB Stations' menu in the main menu of the Gateway. Here you can find the following options:

- ▶ **All stations:** Here you can find all the available stations based on the previous scan.
- ▶ **Favourites:** Your favourite DAB stations. By pressing and holding the fast forward button for 3 seconds while listening to a station, you can add it as a favourite. To remove it from the favourite list, press the previous track button longer. You can also select the 'Delete favourites' option in the 'Favourite stations' menu, with this method you will remove all the stations from the list.
- ▶ **DAB scan:** If you select this option the device will do a full DAB scan and then start playing the first available station (in alphabetical order).
Please note: When travelling frequently between different locations it is recommended to rescan all the stations since the items in the previously saved list might not be available anymore. After the scanning only the 'All stations' list will be refreshed. The existing favorites list remains unchanged.
- ▶ **Service following:** The device has service following support so the currently played station might be available even after moving from the area where the station was originally broadcasted on a different frequency.

Settings menu

Here you can modify the basic Gateway settings in order to personalize it for your needs and make it work properly with your car.

- ▶ **Volumes:** This menu allows you to set different volumes in the system:
 - ▶ iPod, USB, AUX, Bluetooth volumes for music playback
 - ▶ Phone and microphone volume for hands free calls
- ▶ **Languages:** Here you can select between more than fifteen different languages.
Please note: this setting will modify only the language of the menu which is displayed by the Gateway.
- ▶ **Phonebook:** Here you can switch off the automatic download of the phonebook, which is needed in case of certain phone models.
- ▶ **Phonebook display order:** This menu allows you to modify the order of the displayed names. It could be (First then Last or Last and then First name.)
- ▶ **Bluetooth audio:** In case you want to play music via A2DP from your mobile phone, turn the Bluetooth audio option ON here.
- ▶ **Ringtone:** To hear the ringtone of the Gateway this option needs to be turned ON.
- ▶ **Paired Phones:** Previously paired phone names (ID) will be listed here, but only the last four. You can perform pairing from this menu too by selecting the phone from the list. You can also delete the phones from the pairing list.

► **About:** In this menu, you can check the current firmware version of the Gateway and the connected accessories.

Please note: After changing settings you need to turn the Gateway off completely in order to load the system with the new settings. For your information: some settings (e. g. volume) don't require restart.

Using the phone menu

You can enter the 'Phone' menu of the Gateway if you go to the Communication menu of your car. Here you can see the following menu items:

Phonebook: You can select a phone number from your address book to initiate a call. Contacts are shown in alphabetical groups, followed by all contacts in alphabetical order.

Received / Missed / Dialed calls: Provides access to the respective call logs.

Please note: For consistency reasons the Gateway does not store the phone numbers, therefore your phone resynchronizes every time when it connects to the Gateway. Synchronization is possible up to 1000 phone numbers (entries with multiple phone numbers synchronize as multiple entries). The amount of the contacts depends also on the car head unit, so in some cases it might be less than 1000 contacts.

Receiving and making phone calls

When receiving an incoming call, the caller number (if provided) or the corresponding contact name in your phonebook is displayed.

You can answer the call by choosing 'Accept' with the iDrive controller or with the steering wheel buttons (if available). In this moment the music or radio gets muted and the call audio is directed to the speakers. Rejecting an incoming call is also possible through the iDrive controller if you choose 'Reject'.

Please note: ABC search function and call histories are available in the Phone menu.

10. OPERATION IN BMW WITH NON-iDRIVE

FIRST STEPS

Switch on your car radio and push the 'Audio' button. Here you can select CDC as source, which is now the Gateway device.

Connect your iPod or USB storage to the Gateway. It will start playing the first song on the device. In case the Gateway was in use earlier, the music will continue playing from your iPod or USB from where it stopped previously.

When switching off the radio the playback will stop and the source device will go on standby.

You can pair the Gateway 500S BT with a Bluetooth capable mobile phone for music streaming (requires an A2DP capable phone) or hands free (if that option is active in the Gateway). Pairing is controlled from the mobile phone, the same way as connecting to other Bluetooth accessories.

The pin code to the Gateway 500S BT is 0000.

Accessing the menu

The menu of the Gateway is displayed on the screen of the head unit.

Entering the menu

To enter the menu of the Gateway, you need push the 'LIST' button **LIST** on the head unit and then you can move the cursor by rotating the right side rotary knob. If you push the knob, you can select a menu element.

To see the information of the currently played song, you need to select the 'Now Playing' menu, which you can reach with the 'BACK' button **+**. The device jumps to Now Playing mode automatically after a certain time or when a song is selected from the menu.

The UP Button **+** brings you with one submenu back in the menu of the Gateway.

Selecting the music source

In the source menu, you can select between the available music sources.

Please note: In all cases, the Gateway starts to play the last connected music source automatically.

These sources can be:

- ▶ **GW AUX:** The analogue Aux input of the Gateway. No control function is available. AUX can be used if Connector port is connected.
- ▶ **Bluetooth audio:** From a paired A2DP streaming capable phone. The playback is controlled via the phone or with the 'Next' and 'Previous' buttons of your car (phone dependent).
Please note: This feature may be disabled by default but can be enabled from the 'Settings' menu of the Gateway device.

- ▶ **iPod UI:** The playback is controlled via iPod.
- ▶ **iPod GW:** The playback is controlled from the Gateway device (in this case the iPod controls get disabled).
- ▶ **USB:** The playback is controlled from the Gateway.
- ▶ **DAB radio*:** After selecting this source you will be able to listen and manage digital radio through DAB+G.

*DAB+G is required in addition (DBG1GEN)

Browsing and selecting music (iPod or USB)

In the music menu you can use certain menu items to browse the content of the iPod/iPhone or USB device:

- ▶ For USB devices Files, Artists, Albums, Titles, Bookmarks make browsing and selecting music files easier.
- ▶ For iPod/iPhone devices the following submenus will help you with browsing and selection: Playlists, Artists, Albums, Songs, Genres, and Composers

Listening and managing DAB (Optional DAB+G accessory is required)

After the DAB radio source is selected, you will see the 'DAB Stations' menu in the main menu of the Gateway. Here you can find the following options:

- ▶ **All stations:** Here you can find all the available stations based on the previous scan.
- ▶ **Favourites:** Your favourite DAB stations. By pressing and holding the fast forward button for 3 seconds while listening to a station, you can add it as a favourite. To remove it from the favourite list, press the previous track button longer. You can also select the 'Delete favourites'

option in the 'Favourite stations' menu, with this method you will remove all the stations from the list.

- ▶ **DAB scan:** If you select this option the device will do a full DAB scan and then start playing the first available station (in alphabetical order). **Please note:** When travelling frequently between different locations it is recommended to rescan all the stations since the items in the previously saved list might not be available anymore. After the scanning only the 'All stations' list will be refreshed. The existing favorites list remains unchanged.
- ▶ **Service following:** The device has service following support so the currently played station might be available even after moving from the area where the station was originally broadcasted on a different frequency.

SETTINGS MENU

In this menu you can modify the basic Gateway settings in order to personalize it for your needs and make it work properly with your car.

- ▶ **Volumes:** This menu allows you to set different volumes in the system:
 - ▶ iPod, USB, AUX, Bluetooth volumes for music playback
 - ▶ Phone and microphone volume for hands free calls
- ▶ **Languages:** Here you can select between more than fifteen different languages. **Please note:** this setting will modify only the language of the menu which is displayed by the Gateway.
- ▶ **Phonebook:** Here you can switch off the automatic download of the phonebook, which is needed in case of certain phone models.
- ▶ **Phonebook display order:** This menu allows you to modify the order of the displayed names. It could be (First then Last or Last and then First name.)

- ▶ **Bluetooth audio:** In case you want to play music via A2DP from your mobile phone, turn the Bluetooth audio option ON here.
- ▶ **Ringtone:** To hear the ringtone of the Gateway this option needs to be turned ON.
- ▶ **Paired Phones:** Previously paired phone names (ID) will be listed here, but only the last four. You can perform pairing from this menu too by selecting the phone from the list. You can also delete the phones from the pairing list.
- ▶ **About:** In this menu, you can check the current firmware version of the Gateway and the connected accessories.

Please note: After changing settings you need to turn the Gateway off completely in order to load the system with the new settings. For your information: some settings (e. g. volume) don't require restart.

Using the phone menu

You can enter the 'Phone' menu of the Gateway if you press the Menu button of the head unit then select „TEL". You will see the following menu items:

Phonebook: You can select a phone number from your address book to initiate a call. Contacts are shown in alphabetical groups, followed by all contacts in alphabetical order.

Received / Missed / Dialed calls: Provides access to the respective call logs.

Please note: For consistency reasons the Gateway does not store the phone numbers, therefore your phone resynchronizes every time when it connects to the Gateway. Synchronization is possible up to 1000 phone numbers (entries with multiple phone numbers synchronize as multiple entries). The amount of the contacts depends also on the car head unit, so in some cases it might be less than 1000 contacts.

Receiving and making phone calls

When receiving an incoming call, the caller number (if provided) or the corresponding contact name in your phonebook is displayed.

You can answer the call by pressing the phone button in the lower right corner of the head unit, or on the steering wheel (if available). In this moment the music or radio gets muted and the call audio is directed to the speakers. Rejecting an incoming call is also possible through the phone buttons.

Please note: ABC search function and call histories are available in the 'Phone' menu.

11. OPERATION IN MERCEDES

FIRST STEPS

Switch on your car radio and press the 'Audio' button to reach the media section of the head unit. To reach the CD changer option you will need to select CDC with the left side buttons.

Connect your iPod or USB storage to the Gateway. It will start playing the first song on the device. In case the Gateway was in use earlier, the music will continue playing from your iPod or USB from where it stopped previously.

When switching off the radio the playback will stop and the source device will go on standby. You can pair the Gateway with a Bluetooth capable mobile phone for music streaming (requires an A2DP capable phone) or hands free (if that option is active in the Gateway). Pairing is controlled from the mobile phone, the same way as connecting to other Bluetooth accessories.

The pin code to the Gateway 500S BT is 0000.

Accessing the menu

The menu of the Gateway is displayed on the main display of the COMAND radio.

Entering the menu

To enter the menu of the Gateway you need to select Disc 6 with the numerical buttons of the head unit. After you reach the Gateway menu, you can navigate between menu options by pressing the 'Next' or 'Previous track' buttons. You can select the actual menu if you press and hold the 'Next track' or 'Seek+' buttons for 3 seconds.

To see information on the currently played song, you need to select the 'Now Playing' menu by selecting Disc 1 with the numerical buttons of the head unit. The device jumps into 'Now playing mode' automatically after a certain time or if a song is selected in the menu.

To enter a menu you need to press and hold the 'Fast forward' button.

To go back to the previous menu, you need to press and hold the back track button.

Selecting the music source

In the 'Source' menu, you can select between the available music sources.

Please note: The Gateway starts playing from the last connected music source automatically.

These sources can be:

- ▶ **GW AUX:** The analogue Aux input of the Gateway. No control function is available. AUX can be used if Connector port is connected.
- ▶ **Bluetooth audio:** From a paired A2DP streaming capable phone. The playback is controlled via the phone or with the 'Next' and 'Previous' buttons of your car (phone dependent).
Please note: This feature may be disabled by default but can be enabled from the 'Settings' menu of the Gateway device.
- ▶ **iPod UI:** The playback is controlled via iPod.
- ▶ **iPod GW:** The playback is controlled from the Gateway device (in this case the iPod controls get disabled).
- ▶ **USB:** The playback is controlled from the Gateway.
- ▶ **DAB radio*:** After selecting this source you will be able to listen and manage digital radio through DAB+G.

*DAB+G is required in addition (DBGIGEN)

Browsing and selecting music (iPod or USB)

In the music menu you can use certain menu items to browse the content of the iPod/iPhone or USB device:

- ▶ For USB devices Files, Artists, Albums, Titles, Bookmarks make browsing and selecting music files easier.

- ▶ For iPod/iPhone devices the following submenus will help you with browsing and selection: Playlists, Artists, Albums, Songs, Genres, and Composers

Listening and managing DAB (Optional DAB+G accessory is required)

After the DAB radio source is selected, you will see the 'DAB Stations' menu in the main menu of the Gateway. Here you can find the following options:

- ▶ **All stations:** Here you can find all the available stations based on the previous scan.
- ▶ **Favourites:** Your favourite DAB stations. By pressing and holding the fast forward button for 3 seconds while listening to a station, you can add it as a favourite. To remove it from the favourite list, press the previous track button longer. You can also select the 'Delete favourites'

option in the 'Favourite stations' menu, with this method you will remove all the stations from the list.

- ▶ **DAB scan:** If you select this option the device will do a full DAB scan and then start playing the first available station (in alphabetical order).
Please note: When travelling frequently between different locations it is recommended to rescan all the stations since the items in the previously saved list might not be available anymore. After the scanning only the 'All stations' list will be refreshed. The existing favorites list remains unchanged.
- ▶ **Service following:** The device has service following support so the currently played station might be available even after moving from the area where the station was originally broadcasted on a different frequency.

Settings menu

Here you can modify the basic Gateway settings in order to personalize it for your needs and make it work properly with your car.

- ▶ **Volumes:** This menu allows you to set different volumes in the system:
 - ▶ iPod, USB, AUX, Bluetooth volumes for music playback
 - ▶ Phone and microphone volume for hands free calls
- ▶ **Languages:** Here you can select between more than fifteen different languages.
Please note: this setting will modify only the language of the menu which is displayed by the Gateway.

- ▶ **Phonebook:** Here you can switch off the automatic download of the phonebook, which is needed in case of certain phone models.
- ▶ **Phonebook display order:** This menu allows you to modify the order of the displayed names. It could be (First then Last or Last and then First name.)
- ▶ **Bluetooth audio:** In case you want to play music via A2DP from your mobile phone, turn the Bluetooth audio option ON here.
- ▶ **Ringtone:** To hear the ringtone of the Gateway this option needs to be turned ON.
- ▶ **Paired Phones:** Previously paired phone names (ID) will be listed here, but only the last four. You can perform pairing from this menu too by selecting the phone from the list. You can also delete the phones from the pairing list.
- ▶ **About:** In this menu, you can check the current firmware version of the Gateway and the connected accessories.

Please note: After changing settings you need to turn the Gateway off completely in order to load the system with the new settings. For your information: some settings (e. g. volume) don't require restart.

Using the phone menu

You can enter the 'Phone' menu by pressing "TEL" on the COMAND head unit. You will see the following menu items:

Phonebook: You can select a phone number from your address book to initiate a call. Contacts are shown in alphabetical groups, followed by all contacts in alphabetical order.

Received / Missed / Dialed calls: Provides access to the respective call logs.

Please note: For consistency reasons the Gateway does not store the phone numbers, therefore your phone resynchronizes every time when it connects to the Gateway. Synchronization is possible up to 1000 phone numbers (entries with multiple phone numbers synchronize as multiple entries). The amount of the contacts depends also on the car head unit, so

in some cases it might be less than 1000 contacts.

Receiving and making phone calls

When receiving an incoming call, the caller number (if provided) or the corresponding contact name in your phonebook is displayed.

You can answer calls by pressing the phone button on the COMAND head unit, or on the steering wheel (if available). In this moment the music or radio gets muted and the call audio is directed to the speakers. Rejecting an incoming call is also possible by the phone buttons.

Please note: ABC search function and call histories are available in the 'Phone' menu.

12. OPERATION IN AUDI

FIRST STEPS

Switch on your car radio and push the CD button at the centre console. To select the CD changer, choose 'Changer' in the upper left corner of the screen.

Connect your iPod or USB storage to the Gateway. It will start playing the first song on the device. In case the Gateway was in use earlier, the music will continue playing from your iPod or USB from where it stopped previously.

When switching off the radio the playback will stop and the source device will go on standby. You can pair the Gateway with a Bluetooth capable mobile phone for music streaming (requires an A2DP capable phone) or hands free (if that option is active in the Gateway). Pairing is controlled

from the mobile phone, the same way as connecting to other Bluetooth accessories.

The pin code to the Gateway 500S BT is 0000.

Accessing the menu

The menu of the Gateway is displayed on the screen of the head unit.

Entering the menu

To enter the menu of the Gateway, you need select CD6 (or CD12). You can navigate and select a menu element with the MMI control wheel.

To see the information of the actually played song, you need to select CD1 (or CD7). The device jumps into 'Now Playing mode' automatically after certain time or if a song is selected in the menu.

Selecting the music source

In the source menu, you can select between the available music sources.

Please note: In all cases, the Gateway starts to play the last connected music source automatically.

These sources can be:

- ▶ **GW AUX:** The analogue Aux input of the Gateway. No control function is available. AUX can be used if Connector port is connected.
- ▶ **Bluetooth audio:** From a paired A2DP streaming capable phone. The playback is controlled via the phone or with the 'Next' and 'Previous' buttons of your car (phone dependent).
Please note: This feature may be disabled by default but can be enabled from the 'Settings' menu of the Gateway device.
- ▶ **iPod UI:** The playback is controlled via iPod.
- ▶ **iPod GW:** The playback is controlled from the Gateway device (in this case the iPod controls get disabled).
- ▶ **USB:** The playback is controlled from the Gateway.
- ▶ **DAB radio*:** After selecting this source you will be able to listen and manage digital radio through DAB+G.

* DAB+G is required in addition (DBGIGEN)

Browsing and selecting music (iPod or USB)

In the music menu you can use certain menu items to browse the content of the iPod/iPhone or USB device:

- ▶ For USB devices Files, Artists, Albums, Titles, Bookmarks make browsing and selecting music files easier.
- ▶ For iPod/iPhone devices the following submenus will help you with browsing and selection: Playlists, Artists, Albums, Songs, Genres, and Composers

Listening and managing DAB (Optional DAB+G accessory is required)

After the DAB radio source is selected, you will see the 'DAB Stations' menu in the main menu of the Gateway. Here you can find the following options:

- ▶ **All stations:** Here you can find all the available stations based on the previous scan.
- ▶ **Favourites:** Your favourite DAB stations. By pressing and holding the fast forward button for 3 seconds while listening to a station, you can add it as a favourite. To remove it from the favourite list, press the previous track button longer. You can also select the 'Delete favourites' option in the 'Favourite stations' menu, with this method you will remove all the stations from the list.
- ▶ **DAB scan:** If you select this option the device will do a full DAB scan

and then start playing the first available station (in alphabetical order).
Please note: When travelling frequently between different locations it is recommended to rescan all the stations since the items in the previously saved list might not be available anymore. After the scanning only the 'All stations' list will be refreshed. The existing favorites list remains unchanged.

- ▶ **Service following:** The device has service following support so the currently played station might be available even after moving from the area where the station was originally broadcasted on a different frequency.

Settings menu

Here you can modify the basic Gateway settings in order to personalize it for your needs and make it work properly with your car.

- ▶ **Volumes:** This menu allows you to set different volumes in the system:
 - ▶ iPod, USB, AUX, Bluetooth volumes for music playback
 - ▶ Phone and microphone volume for hands free calls
- ▶ **Languages:** Here you can select between more than fifteen different languages.
Please note: this setting will modify only the language of the menu which is displayed by the Gateway.
- ▶ **Phonebook:** Here you can switch off the automatic download of the phonebook, which is needed in case of certain phone models.

- ▶ **Phonebook display order:** This menu allows you to modify the order of the displayed names. It could be (First then Last or Last and then First name.)
- ▶ **Bluetooth audio:** In case you want to play music via A2DP from your mobile phone, turn the Bluetooth audio option ON here.
- ▶ **Ringtone:** To hear the ringtone of the Gateway this option needs to be turned ON.
- ▶ **Paired Phones:** Previously paired phone names (ID) will be listed here, but only the last four. You can perform pairing from this menu too by selecting the phone from the list. You can also delete the phones from the pairing list.
- ▶ **About:** In this menu, you can check the current firmware version of the Gateway and the connected accessories.

Please note: After changing settings you need to turn the Gateway off completely in order to load the system with the new settings. For your information: some settings (e. g. volume) don't require restart.

Using the phone menu

You can enter the Gateway's 'Phone' menu by pressing the 'TEL' button of the centre console then choosing 'Memory' from the upper left corner of the screen. Here you will see the following menu items:

Phonebook: You can select a phone number from your address book to initiate a call. Contacts are shown in alphabetical groups, followed by all contacts in alphabetical order.

Received / Missed / Dialed calls: Provides access to the respective call logs.

Please note: For consistency reasons the Gateway does not store the phone numbers, therefore your phone resynchronizes every time when it connects to the Gateway. Synchronization is possible up to 1000 phone numbers (entries with multiple phone numbers synchronize as multiple entries). The amount of the contacts depends also on the car head unit, so in some cases it might be less than 1000 contacts.

Receiving and making phone calls

When receiving an incoming call, the caller number (if provided) or the corresponding contact name in your phonebook is displayed.

You can answer the call by pressing the phone buttons in the lower corners of the screen, or on the steering wheel (if available). In this moment the music or radio gets muted and the audio of the call is directed to the speakers. Rejecting an incoming call is also possible by the phone buttons.

Please note: ABC search function and call histories are available in the Phone menu.
